SUMMARY

A motivated worker in the software engineering and technology field with 5+ years of engineering experience. I am looking forward to expanding my understanding of software development through problem solving, teamwork, and coding.

EXPERIENCE

Software Engineer

April 2023 – Present

GS1 US

- Implemented new screens and built a new component library contributing to the UI/UX overhaul of our web platform by collaborating with designers, leveraging Angular and TypeScript on pages with over 4 million active visitors per month.
- Designed, implemented, and deployed a greenfield data management solution with a scalable and testable(XUNIT) .NET API layer, including CI/CD pipeline configuration and connection to Azure cloud databases and services using Logic Apps, Service Bus, through collaboration with Solution Architects and Solution Engineers.
- Developed and maintained an open source verification library in TypeScript utilizing Decentralized Identifiers and Verifiable credentials built around json-ld documents, and json web tokens(jwt).
- Created and updated REST APIs to allow users to access 400 million+ products' & location information through both member and global databases utilizing C# with Entity Framework.
- Overhauled the onboarding process for new members of the engineering department.

Associate Software Engineer II

September 2021- March 2023

Medfuse

- Built and deployed a system in which the company uploads new data through a platform developed in C# using .NET & Microsoft Entity Framework Core, handling millions of records, cutting down on time spent loading into production by ~20 percent.
- Developed a system to match over ten million healthcare providers utilizing a string similarity algorithm and geolocation data with ~95+ percent accuracy.
- Managed and designed SQL databases which handled multiple data source streams.
- Implemented a series of services and facets as a full stack developer on the flagship SAAS application (a Blazor server app with an ASP.NET MVC architecture, built with MudBlazor) including Azure & Azure Maps.

EDUCATION

Bachelor of Science in Computer Science

The College of New Jersey, Ewing, NJ

AWARDS & LEADERSHIP

Boy Scouts of America, Troop 137, Hazlet, NJ Eagle Scout & Assistant Senior Patrol Leader

Lions Gaming, The College of New Jersey, Ewing, NJ Assistant Esports Director

SKILLS

C#, TypeScript, JavaScript, C/C++, Python, Java, Go, Angular, React/Next.js, Node.js, SQL, HTML/CSS, Ruby, Bash Visual Studio/VS Code, Microsoft SQL Server Management Studio, Git, GitHub/DevOps, Postman, Azure Data Studio, Android Studio, Agile development, Unity, Eclipse, Windows, MacOS, Linux, Microsoft Azure, Copilot, Chat-GPT, Claude & other AI Technologies
