SUMMARY

A motivated worker in the Computer Science & technology, and gaming field with 5+ years of engineering experience. I am looking forward to expanding my understanding of software development through problem solving, teamwork, and coding.

EXPERIENCE

Software Engineer

GS1 US

April 2023 - Present, Ewing, NJ

- Implemented new screens and components contributing to the UI/UX overhaul of our web platform by leveraging Angular and TypeScript on pages with over 4 million active visitors per month. Collaborated with the UI designers to enhance the user experience and streamline navigation by building a new component library.
- Created and updated REST APIs to allow users to access 400 million+ products' & location information through both member and global databases utilizing C# with Entity Framework.
- Developed and maintained an open source verification library in TypeScript utilizing Decentralized Identifiers and Verifiable credentials built around json-ld documents, and json web tokens(jwt).
- Collaborated with System Architects and Solution Engineers to design and implement a greenfield data management solution with a scalable and testable(XUNIT) API layer, including CI/CD pipeline configuration and connection to Azure cloud services using Logic Apps, Service Bus, etc.
- Overhauled the onboarding process for new members of the engineering department.

Associate Software Engineer II

MedFuse

September 2021 - March 2023, Holmdel, NJ

- Built and deployed a system in which the company uploads new data through a platform developed in C# using .NET & Microsoft Entity Framework Core, handling millions of records, cutting down on time spent loading into production by ~20 percent. • Developed a system to match over ten million healthcare providers utilizing a string similarity algorithm and geolocation data with ~95+ percent accuracy.
- Designed and managed SQL databases which handle multiple data source streams.
- Implemented a series of services and facets as a full stack developer on the flagship SAAS application (a Blazor server app with an ASP.NET MVC architecture, built with MudBlazor) including Azure & Azure Maps.

EDUCATION

Bachelor of Science in Computer Science

The College of New Jersey • Ewing, NJ

AWARDS, HONORS & PROJECTS

Eagle Scout & Assistant Senior Patrol Leader

Boy Scouts of America, Troop 137, Hazlet, NJ • 2016

Assistant Esports Director

Lions Gaming, The College of New Jersey, Ewing, NJ

Elo Matchmaking System

Personal project

- A system for a competitive apex legends organization to match-make players designed with a custom elo algorithm built around apex's public APIs, displayed on a React frontend.

SKILLS

C#, C/C++, Python, Java, TypeScript, JavaScript, Angular, React/Next.js, Node.js, SQL, HTML/CSS, Ruby, Bash

Visual Studio/VS Code, Microsoft SQL Server Management Studio, Git, GitHub/DevOps, Postman, Azure Data Studio, Android Studio, Agile development, System design, Unity, Eclipse, Windows, MacOS, Linux, Microsoft Azure, Copilot, Chat-GPT, Claude & other AI Technologies
